

a voyage of merchants that not even the bravest seas would stop

Traders of Kobberland is a project that expands the Black Sailors 75mm resin miniature line with new and exciting models based on Nordic European Mythology.

At Bigchild Creatives, we have always been fans of the work of Even Mehl Amundsen, so we couldn't resist the idea of proposing him create the Concept Art of one of the crews of the Black Sailors universe.

Each line that he drew and each character, seemed incredible and we just felt fortunate to include his art in one of our own collections.
